Transportation Ltd. Co

# CSR Report

2024

# CSR that reflects national priorities

Every BOST Energies CSR initiative is aligned with Ghana's development priorities:

- National Energy Transition Framework (NETF) for sustainability
- STEM & Technical Education Expansion via the Ministry of Education
- Environmental protection mandates under national clean-up and afforestation programmes

At BOST Energies we are striving to create shared value by linking the fuel that moves Ghana to the futures that sustain it.

## Investing in the Future

We are proud to champion one of Ghana's most impactful STEM education initiatives:

- 50 bright students from underserved depot and pipeline communities are currently studying engineering and

computer science through our full scholarship programme.

- In partnership with the Ministry of Education and seven public universities
- Focused on 12 energy-relevant disciplines, including Petroleum, Renewable Energy, Environmental Engineering, and Cybersecurity.
- Over GHS 1.5 million invested so far.
- Every scholar gains internship experience at BOST Energies and is fast-tracked for national service and potential recruitment.

This is an investment in the long-term talent pipeline for Ghana's energy future.

## Greening Our Duty Stations

- We're committed to environmental stewardship in every location we serve:

- Nationwide Tree Planting Initiative across all depots
- 2,100 seedlings projected, with over 1,000 planted to date
- Active sites include Kumasi, Akosombo, Mami Water, and Accra Plains
- Part of our depot decarbonisation and beautification efforts

This isn't just a tree planting initiative; we're planting legacy.

## Supporting Health & Clean Water

- Nationwide borehole drilling projects to improve clean water access in rural and peri-urban communities
- Medical support for families in hardship around operational zones
- Ongoing assistance to local clinics, schools, and emergency needs

When communities thrive, operations thrive.

## Bridging the Education Gap Locally

- 100,000 exercise books distributed to 54 public basic schools around our depots
- Benefitting thousands of students in low-resource communities
- Supporting literacy and access to materials where it matters most

## Driving Impact Beyond Infrastructure

We recognise that our infrastructure exists in the heart of real communities. Our Corporate Social Responsibility (CSR) investments are built around a simple belief: energy must uplift the lives it touches. Through bold partnerships, measurable action, and consistent investment, BOST Energies is delivering impact across education, environment, health, and community development.

## Building a Better Learning Environment

- GHS 500,000 investment in refurbishing classrooms at Holy Trinity Senior High School
- Modern, safe, functional facilities to inspire the next generation of engineers, leaders, and innovators
